JC Vergel

EPC Project Manager

12025 Richmond Ave. #6103. Houston, TX 77082. Mobile: 305 915 4031. E-mail: jcvergel@gmail.com.

Summary

I have over twenty six years of diverse construction experience in domestic and international oil, gas, petrochemical and power generation industries. Throughout my career, I have acquired a vast comprehension in operations, maintenance, procurement, fabrication, offshore hook up, pipe line installation, project management and business development. I have a Bachelor degree in Electrical Engineering, a Masters in Project Management, speak English and Spanish fluently, and have legal permanent residency (allowed to work) in the United States. Willing to relocate

Experience

EPC Project Manager at ProEnergy Services LLC

July 2012 - 2015

I have successfully completed an EPC Project to furnish a 100MW (ISO), Pratt & Whitney FT4 Twin Pac, simple cycle, Power Plant on budget, time and designed quality for Petroleos de Venezuela - CORPOELEC. Project figures US\$ 35MM, 199,406MH including auxiliary BOP systems, unloading liquid fuel area, fuel polish/treatment system, water treatment system, fire protection system (foam/deluge), commissioning, start up, and turn over to client.

Project Manager at Zaramella &Pavan Construction Co. S.A.

November 2010 - November 2011

Project planned from the scope of work, focused on long-term procurement items and organized a professional team for the erection of two identical heat recovery steam generator (HRSG), CERREY make, to drive a 150MW(ISO) steam turbine-generator for TERMOZULIA 2, a 400MW power plant located West of Venezuela. This \$3.2 million project included the calculus and kinematic study to select proper heavy-lift equipment to safely erect 20 steam-coils 90 feet above ground with an estimated individual gross weight of 150 ton. The project was completed two weeks before schedule with a 25% saving in man-hours and without any time-loss accidents.

Project Manager at Zaramella &Pavan Construction Co. S.A.

April 2010 - November 2010

Pipeline Project for the construction and installation of required underground/aboveground pipe lines system to service liquid fuel, natural gas fuel, demin water, plant air, fire protection to TERMOZULIA IV, a 250MW(ISO) dual fuel power plant located East of Venezuela. The scope of work included hot taps to main

headers, welding stainless and carbon steel joints as per approved welding procedures, sandblasting/coating as required, nondestructive tests, pressure tests, cleaning and flushing of associates pipe lines, and delivery Construction Quality Dossier to client for both underground and aboveground installation.

Naval Project Manager at Zaramella &Pavan Construction Co. S.A.

June 2006 - April 2010

Responsible for organize and implement a Naval Construction Division to build naval equipment to support company's offshore operations. The division delivered 22 maritime units in 3 years. This effort included: three pipe laying barges, four flat barges, two 3500 hp tug boats, two water/diesel suppliers, six aluminum crew launches, three aluminum divers launches, and a upgrade (steam to electric driven) crane barge.

Offshore Project Manager at Zaramella &Pavan Construction Co. S.A.

November 2004 - June 2006

Responsible for planning, procurement, organization, and construction of two concurrent projects for Venezuelan oil company (PDVSA). LAGOMAR: a 24" offshore buried pipeline used as an alternative to handle crude oil from flow station to tanks farmer. New Flow Station UD3: an offshore facility designed and built to handle 5,500 BPD of crude oil and 16.5 MFCSD of natural gas. Project's figures: US\$2.4 million and 300 thousand man-hour.

EPC Construction Manager at Consortium Inelectra - Z&P

February 2003 - October 2004

Responsible for constructability review of design incorporating lesson learned to detail engineering, project scheduling and equipment procurement. Responsibilities also include: resources and departments coordination to execute De-bottlenecking Polypropylene Plant Project for the PROPILVEN-KOBE consortium.

Procurement Manager at American Milestones Enterprises Inc.

February 2002 - December 2002

Responsible for bidding domestic and international projects for the oil, gas, and petrochemical industry. Issued and follow-up purchase orders to domestic and international clients. Coordinated all purchase orders from vendors to clients, including insurance, shipment, customs clearance, and delivered materials to site.

Responsibilities included invoicing and billing to clients.

Construction Manager at Consortium Confurca - Z&P

April 2000 - December 2001

Responsible for planning, construction, installation and pre-commissioning of electrical and instrumentation packages for the ACCRO III-IV LNG plant expansion at JOSE petrochemical complex in Venezuela. Packages furnished with power generators, medium-low voltage power distribution panels, rotating equipment. This effort also included pre-commissioning, as-built drawings, and hand over Construction Quality Dossier to client.

E&I Construction Manager at Zaramella &Pavan Construction Co. S.A.

January 1987 - March 2000

Responsible for planning, construction coordination, fabrication and installation of electrical and instrument packages associates with diverse oil and gas onshore/offshore facilities such as: gas compression modules, flow stations, water injection units, tender and cantilever drilling barges, oil tank farms, crude oil pump stations, load/unload crude oil piers, and submersible pump stations. Responsibilities also included Precommissioning, as-built drawings, and turnover to clients.
